**DETAILED ACTION**

1. Claims 1-32 are presented for examination.

***Election/Restrictions***

2. Claims 1-15 drawn to an apparatus of a nonvolatile semiconductor memory device has page buffers and bitline voltage controller.
3. Claims 16-32 drawn to a method of programming in a nonvolatile semiconductor memory device has registers.
4. Inventions an apparatus of a nonvolatile semiconductor memory device of claims 1-15 and a method of programming in a nonvolatile semiconductor memory device of claims 16-32 are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of programming in nonvolatile memory device of claims 16-32 can be used in a volatile memory device or can be used without page buffers as apparatus of claims 1-15 contained or the apparatus of claims 1-15 can be used without needed of registers as contents of claim method 16-32.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2818

6. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
